The Westside HIV Community Center *Working together to fight HIV*

## The Circle of Empowerment

**Action** is necessary if we are to uphold our community values. **We believe** that HIV must be fought in the context of social change that addresses the impact of poverty and oppression on community health. We believe that HIV is a human rights issue and that apathy in the face of our global pandemic is an atrocity that **we must all fight together**.

**The Circle of Empowerment** supports Common Ground's mission to bring together the diverse members of the Westside community in the fight against HIV. Supporting the general operating costs of the agency, The Circle of Empowerment provides long term stability for our vital work in the community.

We thank our members for their generous support.
